

STRENGTH OF CHARACTER

Why ECS? We have grit. What does that mean for you? That one descriptive word defines our company culture. At ECS, GRIT is made up of four characteristics: guts, resilience, initiative and tenacity. Our boots are made for working. Click [here](#) to get an idea of what we're all about.

PERSEVERANCE WITH PASSION

We focus on developing the people, systems and expertise that allow us to be the consulting firm of choice. Our footprint spans the nation and countless sectors, making us flexible and giving you options. Our passion is to provide high quality services and innovative approaches to our clients. We are looking for problem solvers. Do you have your boots ready?

DRIVE AND DETERMINATION

As a Construction Materials Department Manager, you strive to lead both your team and your profits. You have extensive experience both out in the field as well as handling the "business" side of construction materials testing. Engineers, technicians, and project managers look to you for mentoring both technically and in building client relationships. You know how to set the bar high and not only achieve that goal yourself – but bring others along with you. You are extremely hard working and strive to ensure that your team delivers the best quality. You get the "big" picture and want to contribute accordingly – and that's why you'll have all the opportunity for career growth within our company you'll want. For highlights of others who have taken their amazing skills and grown their careers with ECS, click [here](#).

RESPONSIBILITIES

You will be part of a dynamic, growing and energized team – and your role is key to the success of ECS. While your job duties may fluctuate day to day, here are some areas we expect to see you proficient in:

- Managing CMT services and running the materials testing department
- Business Development and consulting engineering
- Leading well, being a team builder, and making decisions skillfully
- Project management, proposal and report review and preparation
- Overseeing quality control, report review, and management of projects
- Managing a profitable P&L
- Mentoring and managing junior and senior field and laboratory staff
- Working on CMT field and laboratory projects
- Working on geotechnical engineering assignments

QUALIFICATIONS

If you can accomplish the above, your boots are probably ready for walking right into this role. Realistically though, you need the following to be considered:

- BSCE from an ABET accredited university; MSCE preferred

- 8 – 10 years of experience in CMT services and geotechnical engineering in the local market
- PE license or the ability to obtain one within three months

PEOPLE ARE OUR FOUNDATION

We love our employees and we show this through providing some great benefits. Click [here](#) to see how we show our passion for our people.
